DETAILED ACTION

Claim Objections

Claims 7 and 8 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 7 and 8 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

Claims 1-6 and 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 9 lack a clear transitional phrase. In claims 2 and 4, "or the like" is indefinite. In claim 2, "...and is formed of synthetic resin is formed in the recessed portion" is grammatically unclear. The form of the claims render the physical steps required by claims 9-12 unclear. The process must be recited in the form of physical steps that can be performed. Language used for example, "formed such that" obscures the metes and bounds of the claims

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yasuo 6,790,401.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/735,859 Page 3

Art Unit: 3711

Claims 2-6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasuo in view of Morgan 3,879,876.

As to claims 2-5, Yasuo fails to show an embedded medallion or label. Morgan teaches that it is well know to use embedded indicia in the form of a body 48 and a cover 24 in an apparatus in order to provide it with identification. To have included a recessed portion for a label in Yasuo would have been obvious as taught by Morgan in order to provide identifying indicia to the pin. As to claim 6 the flexibility is considered to be an obvious choice in materials. Held is that the selection of a material to take advantages of its known properties would have been obvious absence some particular problem solved or unexpected results.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dettman, Friedman, Satchell, Bauer, Schimanski, Wanders and Hoppes show bowling pins.

Claims 10-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Forming the body on the core prior to the surface skin is not taught by the current art of record.

Any inquiry concerning this communication and its merits should be directed to William Pierce at E-mail address bill.pierce@USPTO.gov or at telephone number (571) 272-4414.

For **official fax** communications to be officially entered in the application the fax number is (703) 872-9306.

For informal fax communications the fax number is (703) 308-7769.

Any inquiry of a general nature or relating to the **status** of this application or proceeding can also be directed to the receptionist whose telephone number is (703) 308-1148.

Any inquiry concerning the **drawings** should be directed to the Drafting Division whose telephone number is (703) 305-8335.
